

THE SLIM EXPERIENCE WORLD TOUR 2026

The World's First Solely Virtual, AI-Generated Concert Experience

FOR IMMEDIATE RELEASE

FRESH OFF LAGOS, THE SLIM EXPERIENCE WORLD TOUR SETS ITS SIGHTS ON MANILA

The world's first solely virtual, AI-generated concert tour brings its sound, its energy, and its movement to the Philippines

The Slim Experience World Tour 2026 just wrapped an unforgettable stop in Lagos, and the momentum isn't slowing down. Next stop: Manila, bringing the full spectrum of culture, sound, and vibes to the city and the people of the Philippines.

The Slim Experience is the first tour of its kind: a fully virtual, AI-generated concert experience built exclusively off real-time analytics from DistroKid, the digital service provider recently acquired by CVC Capital Partners in a deal reportedly valued near \$2 billion. Powered by the hits of DistroKid and presented with the support of premier ticketing partner Promotix, the tour turns raw streaming data into a live, immersive experience unlike anything else on the road today.

Lagos showed what happens when that data-driven artistry meets real, on-the-ground energy, and the response was electric. It confirmed what The Slim Experience has been building toward from day one: this is a global cultural moment, and every stop adds its own flavor to the story.

Manila is next, and the anticipation is already building. The Philippines has one of the most passionate, plugged-in fan communities in the world, and the team is bringing a show designed to match that energy, filtered through the culture and spirit of Manila itself.

More details on the Manila stop, including the full artist lineup and event specifics, will be announced soon. Stay close.

ABOUT THE SLIM EXPERIENCE WORLD TOUR

The Slim Experience World Tour 2026 is a 12-stop global rollout and the first solely virtual, AI-generated concert tour, built off real-time DistroKid analytics and bringing next-generation AI artistry to cities worldwide.
